Appalachian State University’s Southern Appalachian Environmental Research & Education Group and Sustainable Development Program are pleased to host a training for educators in the use of the Leopold Education Project (LEP) curriculum. LEP is an innovative, interdisciplinary, critical thinking, conservation and environmental education curriculum based on the classic writings of the renowned conservationist, Aldo Leopold. LEP teaches the public about humanity’s ties to the natural environment in the effort to conserve and protect the Earth’s natural resources.

LEP is unique in that it uses a classic environmental literary work, Aldo Leopold’s *A Sand County Almanac* to reach students with a conservation ethics message that strives to instill an appreciation for the land community. LEP website: [www.lep.org](http://www.lep.org).

**WHAT:** Leopold Education Project Educators Workshop*

**WHEN:** Saturday, September 22, 9 AM – 4 PM

**WHERE:** ASU/Boone, NC—specific location TBA
